PROFILE

IT and Audio-Visual Specialist with **15+ years** of expertise delivering technical solutions across IT systems, AV setups, and event management. Supported **50+ local and international conferences** and **20+ webinars**, ensuring seamless execution and advanced technology integration. Rebuilt network infrastructure with Uninterruptible Power Supply (UPS) for uninterrupted operations and established Network Attached Storage (NAS) for secure file access and continuity. Committed to optimizing efficiency, data security, and business resilience.

WORK EXPERIENCE

Audio-Visual Specialist/Media Technician

Sunmarke School LLC, UAE | 2023 - Present

Manage and support the media department's technical and creative needs, ensuring the smooth operation of AV equipment and delivering high-quality video production for staff and school events. Conduct training and workshops to empower students with hands-on technical skills and creative expertise.

- Trained students on **Adobe CC** tools, industry-standard software (Premiere Pro, Photoshop, and Audition), and audio-visual equipment to develop practical editing, audio-mixing, and production skills.
- Organized hands-on workshops to engage students in electronics and photography equipment, breaking barriers and building confidence in using professional tools.
- Transporting, setting up, and installing Equipment and supporting Audio-visual tools, including racks, speakers, monitors, and cameras.
- Setting up and performing electrical wiring, programming, and basic construction according to layout diagrams and schedules.

Senior IT & Media Executive, and Tech. Event Planner

Folder Group, Egypt | 2019 - 2022

Managed and executed technical solutions for conferences, events, and webinars, ensuring seamless operations through AV expertise, live support, and optimized team workflows. Played a key role in upgrading and optimizing the network and UPS infrastructure, ensuring seamless operations during conferences and live-streaming sessions. This system safeguarded event workflows from power outages, guaranteeing consistent performance and reliability.

- Implemented and optimized AV systems for **100+** conferences, webinars, and events, ensuring seamless operations and robust technical infrastructure.
- Streamlined video production workflows, maintaining high-quality outputs aligned with social media standards and archiving event highlights for publication.
- Increased team efficiency by **20%** through operational protocol development and staff training on tools like Zoom and Webex.
- Delivered **99% uptime** through live technical support and collaborated with vendors to implement the latest AV technologies.

EXPERIENCE CONTINUED

IT Technician, Technical support

Kimo Store, Egypt | 2017 - 2018

I provided part-time IT and technical support, focusing on troubleshooting, maintaining hardware, and installing security systems for clients.

- Diagnosed and resolved technical issues for PCs, laptops, and networking.
- Supported clients with technical advice and solutions tailored to their needs.

ICT Teacher, and Technical Support

El Ekbal National College, Egypt | 2015 - 2018

At El Ekbal National College, I combined my technical expertise and teaching skills to deliver IT education, support multimedia labs, and enhance the school's technical infrastructure.

- Designed and implemented IT curriculum to improve students' technical skills and proficiency.
- Delivered hands-on training in computer applications and digital tools for over 100 students.
- Automated the school's examination system, increasing accuracy and operational efficiency.
- Supervised multimedia labs, ensuring all equipment and software functioned seamlessly.
- Supported staff and students with AV solutions for educational projects and presentations.
- Provided technical support for hardware, software, and network-related issues.

IT Technician

Lotus for Supplies, Trade, and Computer, Egypt | 2013 - 2014

I provided comprehensive IT support and managed technical operations, focusing on hardware, software, and networking solutions for clients.

- Optimized IT systems through hardware/software installation, troubleshooting, and user training, improving operational stability and client satisfaction.
